OAK BROOK, IL USA: Liberty Equity Management LLC recently selected Stonegate Global Fund Services in partnership with Securitize to provide full-service fund structuring, administration and tokenization services for the World's First Net Lease Security Token Fund™.

According to Michael Flight, CEO of Liberty Real Estate Fund, "Over the past year and a half we vetted numerous fund administration and digitization service companies. The Stonegate Securitize partnership was a comprehensive solution for all of our needs to create, structure, deploy and administer our Security Token fund."

Liberty's Cayman and US fund structure will allow both US and global investors to participate in a diversified portfolio of Net Lease properties, while simultaneously providing investors with future liquidity through the Digital Security feature of the offering.

John McCorvey, Founder & CEO of Stonegate Global and The Catalyst Group (Cayman) stated, "Our service for structuring, tokenizing and administering digital security funds is a great solution for investment managers who are seeking to provide more flexibility and liquidity options for their investors. The Liberty team is well-experienced in commercial real estate and we're very excited that they selected the Stonegate/Securitize solution to deploy the first of its kind, net lease digital security fund."

Jamie Finn, Securitize President & Co-Founder, stated, “We’re very excited to have been chosen alongside Stonegate Catalyst by Liberty as their technology provider and digital transfer agent. Our technology platform enables investors to quickly and easily onboard and subscribe with minimal friction.”
